PROGRAMME

Wednesday, May 12th 2021

08:30-09:00	Registration at ICVS/EM hall
09:00-09:15	Welcoming & program overview
09:15-09:30	Pre-course assessment
09:30-09:45	Capsule endoscopy - What's new in the last year?
09:45-10:00	Behind the scenes: SB capsule technology
10:00-10:15	Live clinical case I - PillCam SB3
10:15-10:30	Coffee-break
10:30-11:00	RAPID Reader software – practical demonstration
11:00-11:15	Iconography & Structured report
11:15-12:15	Reading: Full case 1 (individual workstation)
12:15-13:15	Reading and discussion of segmented videos (individual workstation)
13:15-14:30	Lunch
14:30-14:45	Risks and contraindications of capsule endoscopy – still something to keep in mind?
14:45-15:00	Bowel preparation for small bowel capsule endoscopy – current status and future perspectives
15:00-15:15	How to assess the small bowel cleansing quality in 2021?
15:15-16:15	Reading: Full case 2 (individual workstation)
16:15-16:30	Coffee-break
16:30-18:00	Reading and discussion of segmented videos (individual workstation)

Thursday, May 13th 2021

09:00-09:15	Live clinical case II - PillCam COLON 2 / PillCam Crohn's
09:15-09:30	Mid-gastrointestinal bleeding: occult and visible
09:30-09:45	Virtual chromoendoscopy and TOP 100: software tools for an improved reading experience
09:45-10:00	Should we use capsule endoscopy in celiac disease?
10:00-10:15	Small bowel polyps, tumors and subepithelial bulges
10:15-10:45	Coffee-break
10:45-11:45	Reading: Full case 3 - previous day live case (individual workstation)
11:45-13:15	Reading and discussion of segmented videos (individual workstation)
13:15-14:30	Lunch
14:30-14:45	PillCam COLON 2: technology, software & reading technique
14:45-15:00	Colon capsule endoscopy: Indications & iconography
15:00-15:15	Bowel preparation for colon capsule endoscopy
15:15-16:15	Reading: Full case 4 (individual workstation)
16:15-16:30	Coffee-break
16:30-18:00	Reading and discussion of segmented videos (individual workstation)

Friday, May 14th 2021

09:00-09:30	Activity scores in SB Crohn's Disease – why, when and how?
09:30-09:45	Differential diagnosis - practical considerations
09:45-10:00	Should we use patency capsule in Crohn's Disease?
10:00-10:30	PillCam COLON 2 and PillCam Crohn's in IBD: where we are and where we are going?
10:30-10:45	Coffee-break
10:45-11:45	Reading: Full case 5 - previous day live case (individual workstation)
11:45-13:15	Course evaluation, Post-course assessment & Full case 6
13:15-14:30	Lunch
14:30-16:00	Reading and discussion of segmented videos (individual workstation)
16:00-16:15	Closing remarks

6th Edition CAPSULE ENDOSCOPY TRAINING PROGRAM

SCIENTIFIC ENDORSEMENT

EDUCATIONAL SUPPORT

Medtronic
Further, Together

SCOPE

The Capsule Endoscopy Training Program will be hosted by the School of Medicine of the University of Minho, from May 12th to 14th, 2021. This will be the sixth edition of a dedicated course constructed in order to develop Gastroenterology trainees and seniors' skills on the daily practice of capsule endoscopy.

The Faculty is granted by the Gastroenterology Department of Hospital da Senhora da Oliveira, Guimarães – Portugal, an approved Training Centre of the European Board of Gastroenterology & Hepatology, with a wide clinical, investigational and educational experience on the field of capsule endoscopy.

The course will approach the main technical and clinical aspects of small bowel and colon capsule endoscopy, including state-of-the-art lectures, technology updates, new software developments and tips and tricks on the reading technique. Based on individual workstations for personalized hands-on training, this course allows an adequate balance of theoretical and practical exercise.

TESTIMONIALS

"After this course provided by a well-experienced faculty, the attendees really do believe that it is possible to go on by themselves and take part in capsule endoscopy practice."

Flávia Plácido, MD, Hosp. Univ. Clementino Fraga Filho, Univ. Federal do Rio de Janeiro, Brazil.

"This is a well-structured and deeply thought course, with a faculty known for their wide experience on capsule endoscopy. For me, as Head of a Gastroenterology Department willing to begin capsule endoscopy practice in our center, it was of absolute importance to take part in such a training program, with an excellent balance between theoretical and practical learning."

António Curado, MD, C.H. do Oeste, Caldas da Rainha, Portugal.

"It was a luck and honor to take part in one of the only presental capsule endoscopy training programs to happen during the pandemic. The discussion of clinical cases and the practical component of the course were crucial to develop and mature the attendees' skills."

Carolina Chalm, MD, Hosp. do Divino Espírito Santo de Ponta Delgada, Azores, Portugal.
